

## V5 SAFE-TEE CONTROL SYSTEM

The **Conditionaire "Safe-Tee" V5 control system** is a superior state of the art system which complies fully with AS/NZ 2243.8, AS/NZS 2430.3.6. The V5 performs and exceeds all the functions specified in these standards.

The V5 is equipped with "IVAC" infinitely variable airflow control functionality for energy efficiency.

Over and above the requirements of the Standards the V5 has the following features and options:

- Push button with crystal screen display indicating all functions and alarms.
- Supports dual displays including disabled access controller and multiple emergency stops.
- "IVAC" infinitely variable airflow function.
- Auto Sash Closer Compatible.
- 20 Minute alarm battery back up, to keep display and alarm operating in the event of power failure.
- Auto restart of interrupted power supply. (GPO's and flammable gases still have to be reset manually.)
- Scrubber pump and low water alarm, if fitted.
- Analogue BMS Outputs Available:
  - Sash Position 0 - 10v output.
  - Fume Cupboard ON/OFF Status.
  - Fume Cupboard Alarm Status.
- Emergency isolator for GPO power and gas solenoid.
- Boost function increases fan to maximum speed.
- Lighting can be automatically or manually operated.
- Compatible with manifolded fume cupboard systems\*.
- Retrofit onto existing fume cupboards to conform with current AZ/NZS 2243.8 standards.
