

FUME CUPBOARD

CERTIFICATION AND PREVENTATIVE MAINTENANCE

Conditionaire International is NATA accredited and an industry leader in fume cupboard testing, preventative maintenance and repairs

If you have a ducted fume cupboard, recirculating fume cabinet, chemical storage room exhaust or exhaust hood on your site, there are specialised testing requirements to ensure the equipment is safe for use for all stake holders

Conditionaire International holds NATA accreditation for AS/NZS 2243.8 Fume Cupboard & AS/NZS 2243.9 Recirculating fume cabinet certification. The National Standard AS/NZS 2243.8 Safety in laboratories specifies safety requirements for laboratory fume cupboards and test methods to determine their performance to ensure a workplace adheres to Safework practices

**CONDITIONAIRE
INTERNATIONAL
HAS DEVELOPED
THREE STAGES
OF TESTING AND
SERVICE PLANS
NOW AVAILABLE
TO ALL CLIENTS**

1. Bronze

Appendix A - Smoke containment certification
Appendix B- Average Face Velocity certification

2. Silver - Required

Key areas covered in the annual inspection and testing section in AS/NZS 2243.8 5.5.4. refer to testing and service plan on page 3

3. Gold

Comprehensive certification, inspection and preventative maintenance service. Covers every key aspect of the AS/NZS 2243.8 as well as maintaining equipment to prevent costly breakdowns
